HOW CAN YOU HELP AT HOME?

- Be familiar with the details in the eLearning Information Booklet (especially the FAQ section)
- Establish the guidelines for use from the beginning. Where and when the laptop can be used and what programs and internet sites can be accessed. The device is primarily an education tool although some personalisation is permitted. The way device is used in the home is a parental choice.
- Have conversations on – the student's responsibilities, online safety and details in the information booklet.
- Select where the laptop is used at home – insist on a safe ergonomic area and preferably supervised.
- Have a safe charging point. Acer deems tripping on charging cord or falling on a laptop on the floor as negligence.
- Investigate the Cybersafety help available on the student's laptop. Alternatively visit https://esafety.gov.au/education-resources/iparent for up to date information on how to support your child
- Read the fortnightly newsletter as advice supporting the eLearning program is provided
- Contact the school if you have any enquiries

WHAT CAN THE STUDENT DO?

- Use the device according to the school's computer and internet use guidelines.
- Have a sturdy backpack large enough to carry lunch box, water bottle, folders, pencil case, and device in its protective case
- Always know where the school bag/device is. Use the lockers for practical subjects and lunch times.
- Copy the data (student files) from the hard drive to another source weekly
- Clean the device regularly
- Have a plastic shopping bag inside the backpack to wrap the device in if it is raining
- When travelling in a car - do not put objects on top, travelling in a bus – keep bag close under the seat
- Always use the protective case. Extra materials should not be carried in the case as they can put pressure on the screen which is then likely to crack or be damaged
- Report faults or damage immediately to the Resource Centre. If technical help/advice is needed, visit the Resource Centre
- Have the hard drive free of movies and games as this allows space for school work and does not breach Copyright
- Photos and/or images on the hard drive are suitable for students under 18.
- Only install or download software that has been legally obtained with a valid software licence
